

ACKNOWLEDGEMENTS

The authors thank the following individuals for their contribution to this project: Susan Fuertsch (formerly of WDEQ/LQD) for assistance in reviewing mine permit applications and directing us to sources of premined data, Tony Anderson and Lee Jensen for access to their field maps and openly sharing findings from their Master's theses, Tom Wesche for Powder River Basin bed sediment samples for sieving, and Jim Finley for reviewing a draft of this report that improved the final product considerably.
